

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Rica, and also from Guatemala and Panama, New Grenada. Specimens in Acad. Mps. from Mexico and New Grenada, and in all other collections from everywhere else in Mexico and Central America.

Here endeth the *Icteridæ*, so far as the knowledge of the present writer doth warrant him in attempting to compass.

May 7th.

MR. VAUX, Vice-President, in the Chair.

Twenty-four members present.

The following was presented for publication :

"Notes on *Micropus leucopterus*." By Henry Shimer, M. D.

A letter was read from George W. Tryon, Jr., proposing to deposit his Conchological Library with the Academy on certain conditions, which, on resolution, was accepted. The conchological works consist of about 100 bound volumes, and 60 unbound volumes and pamphlets. With this addition to the Library of the Academy, it will contain nearly every known work published on conchology.
